DETAILED ACTION

1. The finality of the previous office action is removed, in view of the new rejection presented herein.

Claim Objections

2. Claim 19 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 19 fails to further limit the stabilizers claimed in parent claims 11 and 12.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 21, 23-27 and 29-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the composition" in the last line of claim 21. Dependent claims fall herewith.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 07-149575.

JP '575 teaches a composition which comprises silica sol having silica up to a level of 5%, and a polyacrylic acid at a level of 0.001 – 1.0%, which overlaps in scope with the levels of up to 400 ppm of the present invention.

7. Claims 12-15, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 32 and 33 are allowable over the art of record.

9. Applicants amendments have overcome the prior rejections over Bennett and Stone which fail to teach the specified amount of stabilizer in claim 21, and Skee which fails to teach the specified stabilizers. A new prior art rejection is presented herein.
